## **Industrial Piping Systems:**

- Design, fabrication, and installation of industrial piping systems for various sectors such as oil and gas, petrochemical, chemical, and manufacturing.
- Turnkey solutions for fluid transport, including process piping, utility piping, and fire protection systems.

### **1. Pipeline Construction:**

- Turnkey projects for the construction of pipelines for oil, gas, water, or other fluids.
- Services may include route selection, surveying, trenching, welding, coating, and testing.

### **2. Erection of Structural Steel:**

- Design and erection of structural steel for industrial facilities.
- Turnkey solutions for the fabrication and installation of steel structures, including beams, columns, and trusses.

### **3. Equipment Erection:**

- Installation and alignment of industrial equipment such as pumps, compressors, turbines, and chimney.
- Turnkey services for the entire equipment erection process, including foundation work and mechanical completion.

### **4. Modular Skid Systems:**

- Design and fabrication of modular skid-mounted systems for ease of transportation and installation.
- Turnkey solutions for assembling and integrating modular skid systems into existing or new facilities.

### **5. Plant Shutdowns and Turnarounds:**

- Comprehensive services for planned plant shutdowns, including equipment inspection, maintenance, and upgrades.
- Turnkey management of the entire shutdown process to ensure a smooth and efficient turnaround.

### **6. Material Handling Systems:**

- Design and installation of material handling systems, including conveyor systems and bulk material storage.
- Turnkey solutions for optimizing material flow and handling within industrial facilities.

### **7. Chimney Installation:**

- Design of chimney for various industrial processes.
- Erection of a chimney functionality, safety, and compliance with building codes.

### **8. Tank Farms and Storage Facilities:**

- Turnkey projects for the construction of tank farms and storage facilities for liquids and gases.
- Services may include foundation work, tank installation, piping connections, and safety systems.

### **9. Commissioning and Testing:**

- Comprehensive testing and commissioning services to ensure the proper functioning of piping and erection systems.
- Turnkey solutions for pre-commissioning, commissioning, and performance testing.

### **10. Labor Services:**

- Our contract labor solutions offer access to a wide range of skilled professionals, tailored to meet your specific project and industry needs.
- You need to hire your workforce easily, without the hassles typically associated with managing a professional business.

Turnkey projects in piping and erections aim to provide clients with a seamless and fully integrated solution, minimizing the need for multiple contractors and ensuring the efficient and timely completion of projects in the industrial and construction sectors.
